

**The automated office
is on the move.**

EPSON
executive

You know where you're going so take the Epson Executive with you.

Goes wherever you go.
With this computer, you can compute, not just crunch numbers. You can write programs, and you can manipulate them - anywhere. You can manipulate them - anywhere. Because the HX-20 utilizes rechargeable and low-power, Metal Oxide Semiconductor memory batteries and low-power, Metal Oxide Semiconductor memory to keep the computer up and running for as long as 50 hours at a stretch. So compute what you need on the road. What could be simpler? Then dump it all onto a cassette, or into your main running for as long as 50 hours at a stretch. So compute what you need on the road. What could be simpler? Then dump it all onto a cassette, or into your main

Executive is easy to use, too. The full-size ASCII keyboard works just like your favourite typewriter. Add a built-in printer, LCD screen and you have a computer that's never before been so small.

With the HX-20, you can do programming, word processing and data entry just as if you had a big screen. The screen lets you see any 20-column by four line segment you get upper and lower case at will, numbers, punctuation and graphics. And the viewing angle can be adjusted for easy reading.

The Epson Executive with the following contents:
● Microcassette Drive HX-20 cartridge and booklet
● ROM adaptor
● Mains adaptor x 2
● Microcassettes x Manual
● Reference Manual
● Basic Operation Manual
● ECALC and CORRESPONDENT ROMS
● Guarantee Card
● Executive Guide
● CALCULATOR chip inserted into HX-20
● WELCOME program loaded into HX-20
