## LNW80 MODEL 2 IS HERE !

LNW80 II is the first computer of it's kind. Not only is it 100% TRS-80 Model I compatible (as is the LNW80) but it is also compatible with CROMEMCO (CDOS) and CP/M. By virtue of this compatibility, LNW80 II offers you more software than ANY OTHER COMPUTER EVER BUILT! It offers you more than just a quality, high performance, value packed computer (you have that in the LNW80), it offers you FREEDOM.

LNW80 II means FREEDOM OF CHOICE. The choice of software from thousands of software vendors and thousands of programs. Since the LNW80 can read and write virtually any floppy disk from 5" single density to 8" double density, you get even more freedom.

Here's the LNW80 II specs:

\*100% upwared compatible with the LNW80

\*100% more memory:

1. 96K program memory
2. 17K graphics memory
3. 12K ROM BASIC

-----  
125K Total System Memory

\*10% increase in CPU performance (Since RAM can be substituted for ROM and no wait states in RAM)

\*Runs the advanced T8-OS Operating System that has the following outstanding features:

1. Compatible with 64K 1.4 Operating System
2. Cromemco Z-2 software compatible
3. Cromemco System III software compatible
4. Has a conventional BIOS with 60K user RAM
5. Full support for all floppy disk drive types
6. AUTOMATIC DISK DRIVE DENSITY RECOGNITION
7. Compatible with CP/M application programs
8. Compatible with CP/M development languages

\*Runs Digital Research CP/M 2.2 with custom BIOS

CP/M is a trademark of DIGITAL RESEARCH  
CDOS is a trademark of CROMEMCO
